

Exhibit A couples the latest hardware and software with the art and science of digital exhibits to create dynamic presentations for trial proceedings and settlement conferences.

Exhibit A™
digital presentations for litigators

www.ExhibitAdigital.com

"Very creative minds... Joe, JP and Leah offer invaluable assistance during the trial by recommending and creating graphics which greatly enhance the quality of the case presentation before the jury."

Marc B. Zingarini, Esquire
Weber, Gallagher, Simpson, Stapleton, Fires & Newby • Philadelphia, PA

"I have used Exhibit A for 30 cases over the past 6 years with outstanding results. One recent example is a \$14.5 million settlement for a personal injury case. The narrated PowerPoint™ DVD created by Exhibit A for review by the mediator and defendant was instrumental in securing this very favorable result."

Patrick E. Dougherty, Esquire
Dougherty, Leventhal & Price • Kingston, PA

"Leah learned my case, understood the complex challenges and developed smart visuals to guide the jury. Her technical skills during critical phases of a 6 month construction defect trial, including custom computer animations and immediate access to thousands of photographs and exhibits, proved to be invaluable and contributed to the outstanding result – a no cause in a \$60 million dollar case. Since then, I have used Exhibit A for mediations, settlement conferences and trial prep. Their high-quality work product helps produce excellent results."

Wendy H. Smith, Esquire
Marshall, Dennehey, Warner, Coleman and Goggin
Roseland, NJ

Exhibit A Services

Pre-trial Preparation – All trial exhibits including photos, video, medical records, police reports, x-rays, MRIs etc. are scanned, labeled and archived electronically. Exhibit A also creates 3D Models and animations.

Settlement, Mediation & Arbitration Services – Exhibit A creates compelling presentations of case evidence that convey to the opposition the seriousness of your case and allow the decision maker to see the arguments the way the jury would. Narrated PowerPoint™ DVDs are an excellent approach for a demand package.

Digital Presentations – PowerPoint™ presentations are prepared for use during Opening Statements, Closing Arguments and demonstrative exhibits during trial. The most important feature is the ability to show information "a piece at a time" so that the jury sees and hears your points in order.

Trial Support – High-resolution notebook computers, data projectors and document cameras are deployed in the courtroom to provide high-quality, big-screen viewing for everyone. Award-winning Trial Director™ software is utilized to display, magnify and highlight trial exhibits. With the addition of monitors, the "publish to the jury" setup becomes a portable high-tech courtroom.

Training – Exhibit A can train your trial team to assist in pre-trial preparation and/or to operate the hardware and software during trial. The training sessions provide hands on experience using evidence from your firm's upcoming trial.

Equipment Rental/Consultation – Exhibit A rents trial technology equipment on a daily/weekly basis or provides consultation to your firm to purchase your own equipment.
