Assessment Annotation for Undergraduate Courses

Course Designation and Title ELE/M 426 Solving Literacy Difficulties

Semester/Year Fall 2011

Instructor Mrs. Justina Martin

Assessment Activity

Briefly describe your Assessment Activity Students completed their first set of lesson plans for a literacy lesson in Kindergarten using an anthology.

In assessment of Student Learning Outcome(s) [write out course objective(s) and number(s)]

7. Create instructional materials and literacy lessons for a heterogeneous group of students.

Create instrumental material and literacy lessons for a heterogeneous group of students

Core Knowledge & Skills [Applicable to ALL Courses] 5. Demonstrate an understanding and application of the knowledge and skills necessary for serving Christ in the Church and Society.

Results of Activity

Briefly describe the Results of the Activity

While grading the assessment, I noticed that several students were missing key pieces to reading instruction lessons, including a word recognition skills as well as a comprehension skill in each lesson. The differentiated instruction component of several of the lessons was also weak or not consistently used throughout the lesson plans.

Analysis of Results

Briefly describe your Analysis of the Activity

I realized that the syllabus for next fall needs to be modified for the assignment to give a more detailed explanation of expectations to be included in each lesson. I also need to more effectively communicate this idea to the students in class.

Actions to be Taken

Briefly describe the Actions to be Taken based on the Analysis of Results

I will meet with four of the students privately to review their individual lesson plans and provide feedback for improvement. I will provide a review of word recognition skills and comprehension skills for entire class an how these skills are taught in different grade levels in literacy instruction.
