# 2nd Generation Night Vision Goggles

AN / PVS-5C

---

The PVS-5C night vision goggles are precision manufactured to military specifications and provide operating vision capabilities at night. High performance, mil-spec and standard grades are available, plus fast lens systems and a choice of three mounting configurations to suit both tight budgets and ultra high performance needs. Built in LED light source lets you enhance light levels for close up work, or see under very dark conditions. These goggles have been used by military, law enforcement, and personal security.

Anyone can own these night vision goggles and there are no possession restrictions. The PVS-5C goggles give you excellent visual acuity in the worst lighting conditions. Use them for driving, walking, or during power outages and night time emergencies.

## Specifications:
