Richard K. Iizuka
Chief Deputy

ANNUAL APIARY REGISTRATION NOTIFICATION

Dear Beekeeper:

Your 2018 Apiary Registration Form is enclosed along with important information.

Please Note: The Apiary Registration Form must be filled out completely and returned by January 1, 2018, or when your apiary first enters Los Angeles County.

Section 29040 of the California Food and Agricultural Code states in part:

"Every person that is the owner or in possession of an apiary which is located within the state, on the first day of January of each year, shall register the number of colonies in each apiary ..."

Section 29043 states in part:

"Registration of an apiary shall be filed with the commissioner of the county in which the apiary is located..."

THE 2018 APIARY REGISTRATION FORM

Colony Locations: Provide details of colony (apiary) placements for mapping purposes.

For Urban (City) Placements: Please provide a full address or Parcel Number.

For Rural Apiaries: A location description with GPS Coordinates is required.

(Example: Big Tujunga Canyon Rd. & Foothill Blvd. - 34.2356, -118.2453)

Months on Site: Indicate which months of the year the hives will be on site (e.g. Oct-Dec).

Crop Report Information: Please note that Crop Report Statistics reflect previous year figures.

Live Bee Removal:

If you intend to perform live bee removal and/or swarm pick-up and would like to be contacted by the public, please indicate so on the back of the registration form. In Los Angeles County, as an estimated 80% of feral bees have been Africanized, it is important that such colonies be destroyed if deemed aggressive or re-queened immediately for public safety.

(Live bee removal does not require possession of a State Pest Control Business License)

Bee Removal Using Pesticides:

For activities involving any use of pesticides, you must possess a valid State Pest Control Business (PCB) License. The type(s) of required license(s) is determined by the location at which the bees are located. Please call our office at (626) 575-5466 for information about obtaining an appropriate license.

Submit your completed Apiary Registration form by mail:

County of Los Angeles Department of
Agricultural Commissioner/Weights & Measures
12300 Lower Azusa Road, Arcadia, CA 91006-5872

OTHER IMPORTANT INFORMATION

BEE QUARANTINE REGULATIONS

Receiving hives from out of state

Red Imported Fire Ant (RIFA) Quarantine is unchanged. Bees and/or bee equipment entering California are issued a "Quarantine Warning Hold Notice" at a port-of-entry inspection station. Upon destination arrival, you must call for inspection by the County Agricultural Commissioner.

No charges apply for inspections of incoming shipments.

Moving bees to another state

Prior to exiting California, you may need to obtain a RIFA Quarantine Compliance Certificate (Fee based on number of colonies in shipment).

If you need this service, please call our Quarantine Division at (562) 622-0426.

ZONING AND CITY ORDINANCES

To determine if a City has ordinances or zoning restrictions regarding keeping bees, please contact the respective City Land Use or Zoning Code Enforcement departments. Some Cities (e.g., Burbank, Glendale, Los Angeles, etc.), have zoning codes and maps displayed on their websites.

Registration with our department does not exempt you from compliance with County/City ordinances.

CERTIFIED PRODUCER'S CERTIFICATE (CPC)

Beekeepers who intend to sell their honey products at California Certified Farmers' Markets are required to possess a current and valid Certified Producer's Certificate (CPC).

Prior to certification as a Certified Producer, a beekeeper must register his/her apiary with the Los Angeles County Agricultural Commissioner Apiary Program by calling (626) 459-8894. To obtain a CPC, please contact our Direct Marketing Division at (562) 622-0426.

BACKYARD BEE KEEPING REMINDERS

All municipalities have nuisance ordinances, even in areas that allow beekeeping. Therefore, if you intend to keep hive boxes within any city limits, it is important to follow these suggestions:

- **Check Zoning Ordinances**
- **Provide a water source**
- **Encourage hive bees to fly upward**
 - Devise a structure around hives to encourage bees to fly above eye level (8-10 feet)
- **Maintain distance from public areas (roads, parks, schools, etc.)**
 - Bees may sting unsuspecting people as far as 100 feet or more from the hive.
- **Re-queen the hive with known genetics**
 - Re-queening with temperate queens will help prevent aggressiveness.
- **Be sensitive to your neighbors**
 - Keep hive boxes as far away and hidden from neighboring properties as possible.

Common courtesy can be sweeter than honey!

If you have any questions or require additional guidance or information, please contact us as follows:

• **Inspector Noriel Reyes: (626) 459-8894**

• **Inspector Scott Wirta: (626) 459-8895**

We appreciate your cooperation and wish you a very successful and productive new year.

Sincerely,

Kurt E. Floren
Agricultural Commissioner
Director of Weights and Measures
