- Decoys must be made of wood, cork, or stretched canvas; glass eyes are permitted and materials other than wood can be used in fragile tails and crests. Machine duplicated decoys will be disqualified.

- Carvings must have sturdy tails and all raised wings must be durable.
- No burning or fine stoned texture is allowed. However, simulated texture using gesso, modeling paste, or texturing paint in combination with combing, scratching, or brushing is acceptable. Minimal carving techniques used to simulate feather texture on heads, i.e. merganser heads are acceptable.
- Painting techniques shall be typical of modern functional decoys. Entries may include some simple blending of feather edges and internal markings, feather splits, highlighting and hand vermiculation. (Carvings with fully developed painting should be entered in the Super Slick division.
