

Faux Brick® by Artcrete, Inc.

Stenciled Concrete™

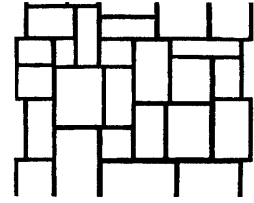

STENCIL PATTERNS

Faux Brick® Stencils are made of water-resistant fiberboard with a plastic coating. The Stencils are 22 mil thick, and most are available in both adhesive-backed and non-adhesive forms. Stencils are used in conjunction with Faux Brick® Color Hardener to create brick, stone, slate and tile patterns on cast-in-place concrete. Stencils are also used in conjunction with Faux Brick® Deck Coat to create brick, stone, slate and tile patterns on existing concrete.

FAUX BRICK[®] COLOR HARDENER

Faux Brick Color Hardener is a ready to use, dry shake material designed specifically for use with Faux Brick Stencils to create brick patterns and other designs in concrete. It is also well suited for coloring, hardening and finishing new concrete floors, walkways, pool decks and other flatwork. Faux Brick Color Hardener is a special formulation of graded mineral aggregates, inorganic pigments, Portland cement, and surface conditioning and dispersing agents. The aggregates are selected for hardness and purity, then carefully graded through a wide particle size range to produce a dense, wear resistant surface. Available in 25 colors.

FAUX BRICK® TEXTURE PRODUCTS

Texture rollers used with release agent add texture and accent color to your concrete. This antique look greatly enhances Faux Brick stenciled concrete and all other decorative concrete. Rollers come in two widths: 22½" wide rollers for imprinting continuous texture in large areas, and 6" wide rollers for cutting in small areas. Texture mats are 24" x 24" and used for imprinting small areas and for getting onto concrete without leaving footprints.

TEXTURE ROLLER FRAME

- Large Texture Roller Frame is used in conjunction with the interchangeable Large Texture Roller Sleeves. The Sleeves are affixed to the Texture Roller Frame with two end caps. The Frame is shipped with one 9 lb. weight.
