Pre-order--- 2017 Listing of Tomatoes

Thank you for looking at my listing of tomato varieties that can be pre-ordered for the 2017 season. The deadline for pre-ordering is APRIL 15th. I am sorry, no late orders accepted.

My "Tomato Days" sale this year will be held on the Victoria Day weekend, May 20, 21 and 22, from 8-4 pm. But there is no rush to be here on that weekend as I remain open up until mid to late June for seedling and seed sales.

Also available is a very big selection of peppers, sweet and extremely hot, eggplants and most other heirloom vegetables, herbs and some flowers. Some very cool stuff indeed.

This year I will open May 1st for cool weather seedlings like broccoli, kale, lettuces, chard and much, much more. Details to follow on my website and Facebook page.

This listing has a good variety of colours, shapes and sizes. All plants are limited quantity. I do my best to fill orders and generally do, but there is a chance I will run out as the advance orders become more plentiful. Please list substitutes, or if I do run out, I will offer you something similar, with your approval.

Not all are heirlooms, and all but one are open pollinated meaning you can save your own seed. (The one that is a hybrid..well, that's Sungold. It's tremendous.)You'll find some great tasting tomatoes in this list, all of which I grow and highly recommend. If you have any questions at all about any of these tomatoes please call or email me.

Why pre-order? To make sure you get what you want! I do grow lots of plants and never run out, but do sell out of some specific varieties.

All plants are potted up into 3 1/2 inch pots, are approximately 6-8 weeks old when you pick them up and are hardened off and ready to go in the ground.

My plants are all grown from organic seed, much of it my own seed, without the use of any chemical inputs.

Plants this year are still \$4.00, regardless whether they are pre-ordered, or picked up on "Tomato Days" or at some other time. Payments can be made by snail mail, with the accompanying order form, (mail to 74038 Reg Rd45, Wellandport, On. L0R 2J0) by email transfer or Paypal and an accompanying email order(email: treeandtwig@sympatico.ca). ***There is no online ordering, per se.***

2017 Heirloom and Open Pollinated Tomato Seedling Advance Order Listing

Please indicate as well your preferred date for pick up, after May 12th. There will be no order pick ups on May 19th as I ready for the sale. There are no exceptions to this, I am sorry. I will not be shipping orders this year-the cost is simply prohibitive.

Thank you so much for your continued support and here's hoping for a great year in the 2016 garden.

- Linda

NOTES:

Indet means "Indeterminate" which most heirlooms are. This means the plants keep growing and producing until a frost kills them. The plants can become huge, so plant accordingly.

Det means "determinate". These plants stop growing when they reach their genetically determined size. You can expect to get one good harvest. These are great for pots or smaller gardens.

Reg leaf means, yes, your typical tomato leaf, as opposed to "potato leaf" which look like potato leaves, angora which are fuzzy, rugosa which are smaller compact leaves.

After each plant you will see a number referring to days. This is the number of days that generally it will take for the plant to produce edible fruit from transplant. 55-60 is pretty early.

	Bicolour
