

# Meeting industry needs

Jack and Rose Spaanderman welcomed more than 130 ACCI members and guests to their new premises located at 65 Copal Road, in the Pendeen Industrial Estate for August's Business After Hours and the official opening of Allroad Motor Body Builders' new premises.

Planning for the new workshop started three years ago with the finished result a massive space that houses two five-tonne cranes and provides ample room to work in. The new premises can accommodate mining HaulPak vehicles...the only facility in the Great Southern able to do so.

Allroad was formed nine years ago and today manufactures, services, repairs and sells quality road transport equipment. "Allroad delivers quality and competitive road transport equipment to the farming, earthmoving, timber and mining industries," Jack said.

"Allroad Motor Body Builders has become synonymous as specialist suppliers and designers of custom built rolling stock and has provided its clients with expertise in building road transport equipment," Jack said. "We can deliver a diverse range of products, each tailored to meet individual needs. Whether it is converting a prime mover to a tipping tray with chassis extension, to manufacturing a semi-tipper, we can do it."

In recent times, Allroads business had expanded to manufacturing side tops for the mining industry.

Jack paid tribute to his dedicated and skilled staff, and thanked his clients for their support. "Drop in or call us today to see how we can help meet your industry needs," he said.

The Jack and Roses' daughters, Megan and Amanda, cut the ribbon to officially open the premises.
