Science	1st	2 <sup>nd</sup>	3rd
Scientific Inquiry			
☐ Asks engaging questions about objects, organisms, and events in the environment			
☐ Plans a simple investigation of objects, organisms, or systems and predicts what will happ	en		
☐ Conducts the investigation using the senses, simple equipment, and tools; collects data			
☐ Arranges data and observations into patterns and compares them with predictions			
☐ Uses observations to develop reasonable scientific explanations for student investigation			
☐ Compares and contrasts one's explanation with the explanations of others			
☐ Describes and explains individual and group observations and results			
☐ Explains a simple design problem directly related to students' experiences			
☐ Designs a device that will be useful in solving the problem			
☐ Builds a device using the material and tools provided (e.g. device for growing plants)			
☐ Tests the device and record results using given instruments, techniques, and measurement	method	ls	
☐ Decides if the solution worked based on test results			
☐ Applies simple tools of mathematics to measure data			
☐ Uses the skills needed for oral and written communication (e.g. describe findings)			
Interconnections of life, physical and earth/space sciences			
☐ Explains structures in organisms that serve specific functions in growth and survival			
☐ Describes some structures and their functions for parts of human bodies			
☐ Shows how organisms can be grouped or classified based on how similar or different feature.	ires are		
☐ Identifies with the senses or simple tools several observable properties of objects			

☐ Measures and records properties of objects with simple tools (rulers, times, balances, and thermometers)
☐ Identifies forces in nature that can be observed and explain ways to change or modify forces
☐ Explains how the position and motion of objects can be changed (pushing or pulling)
☐ Describes how weather changes are daily and seasonal and how they relate to energy from the sun
☐ Identifies how weather can be measured by quantities such as rainfall, temperature, or wind speed
☐ Observes and describes the properties, locations, and movement patterns of objects in the sky
Understands the relationships among science, technology, and society
☐ Demonstrates a knowledge of basic safety practices when doing science
☐ Gives examples of scientists and engineers working in teams to contribute to the overall result
☐ Describes that scientists include women and men of all ages and from all cultures
☐ Describes the diversity of women & men of all ages and cultures that have contributed new scientific ideas
