

## Charrette

The spirit of the Charrette is to get the first ideas on paper prior to the end of class today. The outcome of this charrette is to provide more focused and relevant questions prior to traveling to Haiti.

By 4:45 complete the following:

1. Conceptual/Schematic Site Plan – create a overall plan to communicate how the key elements of the project are working together.
2. Perspective Vignette – Create a perspectival image/sketch to communicate the atmosphere of the community.
3. Conceptual/Schematic Floor Plan – create a plan of one or more of the living units to demonstrate how the interior spaces and small scale human activity relate to the larger community issues.
4. List of Questions – As you work on the above images and sketches compile or refine key questions that emerge in the process and outcome of your work.

Focus on the generation of quality questions over the quality of the sketch. Complete all of the elements above. The sketches may take a variety of format, scale, or mediums as your team sees appropriate.

At 4:45 the instructors will meet briefly with each team to determine the key questions and issues that should investigated over the week.
