

PREDICTING WITH PROGRESSIONS

WITH KELLY SURTEES

What are secondary progressions?
How can they help you create concrete forecasts?

Learn to predict with progressions and discover how these special cycles can time permanent shifts, profound progress and major turning points.

You'll discover the main five planets to use by progression, and explore how their activations show change in your own chart and in the charts of others. You'll also get an introduction to the secondary progressed Moon phases and learn how that cycle connects to changes in fortune, health and abundance throughout your life. Deepening your understanding of how a birth chart functions and evolves over time will help you provide more effective forecasts for yourself, loved ones and clients.

This will be a full day workshop on the topic of secondary progressions. It's suitable for students who are already familiar with topics, such as aspects and chart interpretation, as well as more advanced students and astrologers who want to better understand how to use secondary progressions. Students will be introduced to the concept of movement in the chart as we explore a popular and easy-to-use timing technique.

Secondary progressions can highlight transitions and turning points in love and relationships, work and life direction, and around health and wellness.

Kelly blends traditional astrology techniques in her modern practice to provide clients and students a holistic experience with astrology. She teaches online astrology classes and offers clients consults and mentoring for students of all levels.

An Aussie by birth, Kelly lives in Canada and spends most of the year traveling to teach and consult on astrology. When she is not sharing her love for the stars, you can find her at the beach, in the garden or baking.
