

3.2 First aid

Policy statement

In our setting staff are able to take action to apply first aid treatment in the event of an accident involving a child or adult. At least one member of staff with current first aid training is on the premises or on an outing at any one time. Newly qualified staff who achieved an early years qualification at level 2 or 3 on or after 30 June 2016 also have a paediatric first aid certificate in order to be counted in the adult:child ratios. The first aid qualification includes first aid training for infants and young children. We have evidence of due diligence when choosing first aid training and ensure that it is relevant to adults caring for young children.

Procedures

The first aid kit

- Our first aid kit is accessible at all times, complies with the Health and Safety (First Aid) Regulations 1981 and contains the following items:
 - Triangular bandages (ideally at least one should be sterile) x 4.
 - Sterile dressings:
 - Small x 3.
 - Medium x 3.
 - Large x 3.
 - Composite pack containing 20 assorted (individually-wrapped) plasters x 1.
 - Sterile eye pads (with bandage or attachment) eg No 16 dressing x 2.
 - Container of 6 safety pins x 1.
 - Guidance card as recommended by HSE x 1.

- In addition to the first aid equipment, each box should be supplied with:
 - 2 pairs of disposable plastic (PVC or vinyl) gloves.
 - 1 plastic disposable apron.
 - A children's forehead 'strip' thermometer.
 - A cold pack is kept in the fridge.

- The first aid box is easily accessible to adults and is kept out of the reach of children.
- Information about who has completed first aid training and the location of the first aid box is provided to all staff and volunteers. A list of staff and volunteers who have current PFA certificates is made available to parents.

- There is a named person in the setting who is responsible for checking and replenishing the first aid box contents.
- Medication is only administered in line with our Administering Medicines policy.
- At the time of admission to the setting, parents' written permission for emergency medical advice or treatment is sought. Parents sign and date their written approval.
- In the case of minor injury or accidents, first aid treatment is given by a qualified first aider.
- In the event of minor injuries or accidents, we normally inform parents when they collect their child, unless the child is unduly upset or we have concerns about the injury. In which case we will contact the child's parents for clarification of what they would like to do, i.e. whether they wish to collect the child and/or take them to their own GP.
- An ambulance is called for children requiring emergency treatment. We contact parents immediately and inform them of what has happened and where their child has been taken.
- Parents sign a consent form at registration allowing staff to take their child to the nearest Accident and Emergency unit to be examined, treated or admitted as necessary on the understanding that parents have been informed and are on their way to the hospital.
- Accidents and injuries are recorded in our accident record log and, where applicable, notified to the Health and Safety Executive, Ofsted and/or local child protection agencies in line with our Recording and Reporting of Accident and Incidents Policy.

Legal framework

- Health and Safety (First Aid) Regulations (1981)
