Dear Debbie,

I think you may have been expecting this note, and here it is. Thank you and Mike and especially Ron Gould, for continuing to make some of your community members (the Kalef and Szames families) and their extended family and many guests to their home to enjoy the Succah which contains the many Pine branches used for the roof of the "dwelling", supplied by the Bexley Parks and Recreation administration. Ron Gould has been involved physically in pruning the pine trees for about 8 years, now. This has been wonderful for us and certainly allows us to celebrate the holiday of Succos in a most meaningful manner.

The City of Bexley can be proud of your agency. You serve your constituents in many, and special ways. You may not always obtain the praise for the condition of Bexleys parks and the upkeep, but you certainly have a part of the community that is grateful for your caring and understanding. Thank you again for all of your assistance.
