

Ulti-Mate

The Ultimate Sign Support System

Traffic signs are the primary source of information for motorists, but even the biggest and brightest sign is only effective if the support it is mounted on keeps the sign in its intended position. Sign support needs to be strong, versatile, and cost effective. The Ulti-Mate Sign Support System, approved by the Federal Highway Administration, is the most reliable, economical and easiest to install support system available.

- Compatible with all existing square posts
- Mating tube sections allow for fast, safe, ground-level installations
- Ground anchor posts allow for rapid replacement installations when necessary
- Square tube sections provide superior resistance to wind and other forces over U-channel or round posts
- The Ulti-Mate Sign Support System provides four flat surfaces for mounting signs in any direction and at any height without the need for additional hardware
- FHWA approved as meeting safety requirements for sign supports

Ulti-Mate Colors

Any color, any size, any tube!

Now you can have any of our Ulti-Mate Sign Support Systems in your favorite color! Available in four standard colors with an unlimited number of custom colors. Produced utilizing a Polyester TGIC Powder Coating with a high-gloss finish. In field tests, powder coating has shown to outlast all other known finishes for color intensity and durability. The finished product is carefully packaged to protect the post during shipping.

- Available in 12- and 14-gauge steel that complies with ASTM specification A653
- Hot-dip galvanized conforming to coating designation G-140 for excellent corrosion prevention
- Meets manufacturers' minimum 2-mil thickness requirements
- Powder coating is applied after all fabrication, cutting and punching for flawless color
