OUR PART NUMBER:
R11-4-3624-EG

Popular MUTCD and CA MUTCD work area signs are stocked in Engineering grade reflective on .063 aluminum, sized to fit on conventional type I barricades. Additional legends, sizes and alternate grades of reflective material and aluminum substrates are available by special order

Tech notes:

- By MUTCD standards, portable work area signs mounted on barricades need to be a minimum of one foot above ground level.
- Custom legends can be quickly created in our in-house sign shop
- LEFT, TURN and BIKE overlays are available for the W20-5 sign.
- About our part numbers:

  W20-1-3636-EG (sample number)

  W20-1 is the official sign designation

  3636 is the size of the sign in inches

  EG is the grade of reflectivity; **EG** Engineering Grade Reflective, **EGP** Engineering Prismatic Reflective, **HIP** High Intensity Prismatic reflective and **DG** for Diamond Grade reflective.
