INFORMED CONSENT FOR TESTING PROCEDURE

Thermal Breast Imaging (otherwise known as breast thermography) detects and visualizes the thermal emissions (temperature) occurring at the surface of the breasts. The purpose of the examination is to detect signs of inflammation or unusual blood vessel activity that could suggest risk for current and/or future risk for cancer. Initial _____

I understand that Thermal Breast Imaging is used only as an adjunct to primary screening examinations such as physical breast examination, mammography, breast ultrasound and breast MRI and does not replace any other breast examination or screening. I also understand that thermal imaging does not and cannot directly detect or be used to diagnose breast cancer. Nor can it rule out the presence of breast cancer since some cancers do not produce sufficient temperature changes at the surface of the breasts to be seen with thermography. Therefore, breast cancer may still be present despite thermal imaging revealing a low risk. For that reason, thermal imaging does not replace any other breast examination. All breast concerns including but not limited to skin changes, nipple discharge, lumps or other abnormalities, clinical findings and radiographic findings require evaluation by a medical doctor regardless of the thermal imaging results. Use of thermography as a stand-alone detection examination is not recommended as it can result in the failure of an existing cancer to be detected. Initial _____

I confirm that I have followed the written pre-examination protocols for breast imaging provided to me before the examination. I understand that if I did not receive or follow these protocols, the accuracy of my examination may be compromised. Initial _____

By signing below, I hereby acknowledge that (1) I have read and understood each of the above paragraphs; (2) I have had an opportunity to ask any questions I may have had; (3) any questions I asked were answered to my satisfaction; (4) I have received sufficient information with respect to thermal imaging to make an informed decision to undergo the procedure; (5) I understand no guarantee or warranty is being made that all risk for current and/or future cancer will be detected; and (6) I hereby authorize and consent to thermal imaging
