

3M Science.
Applied to Life.™

Partner with 3M to enhance your revenue potential.

3M™ Window Films allow you to enhance ordinary glass to help homeowners address concerns about fading, hot spots, UV rays, glare, privacy and security—without limiting natural sunlight or restricting window views. These films come in different types and shades that you can use to customize and improve the performance of your glass products.

Creating additional value for your customers through enhanced glass performance may allow you to command better prices for your products and boost your revenue potential.

A partner you can trust.

- No one has more experience with window film than 3M. In 1966, we received the first patent for window film
- For decades, 3M has remained a world leader in adhesive and film technologies. We'll continue to conduct research and testing to help ensure our window film products meet your customer's needs.
- With millions of square feet of 3M Window Films installed around the world, we stand behind our products. We offer a limited lifetime warranty that covers both the material and labor should the window films need replacing. We also warrant against glass failure due to thermal shock fracture or seal failure.*
- 3M Window Films are sold and installed by authorized 3M dealers who are professionally trained and certified to provide you the highest quality of workmanship and service.
- With great consumer brands like Post-it®, Filtrete®, Scotch® and Scotch-Brite®, the 3M brand is recognized and trusted by 3 out of 4 homeowners.

Referral Agent Program**

▼ How to get started.

It's simple: For homeowners looking to purchase new glass enhanced with 3M™ Window Films, simply contact an authorized 3M dealer for a quote and then sell them pre-filmed glass.

To enhance the performance of your customers' existing windows, join the 3M Referral Agent Program and refer them to one of 3M's authorized, certified and trained dealers. They'll provide a free estimate, perform all arrangements and labor, and then send you a check for 10%* of the project sales when payment is collected. It's *that* easy.

*Minimum and maximum sales may apply. Please speak with your local authorized 3M Window Film Dealer about their payment terms.

Fabrics, wallpaper, wood floors, photos and other valuables may fade when unfiltered sun shines through windows. 3M™ Window Films help protect your customers' possessions from the three main causes of fading.

All the comforts of home, protected.

Your customers trust your expertise about glass. Now you can become even more valuable to them by offering a wider range of glass-related benefits:

UV and Fade Control 3M Window Films are designed to block up to 99% of the sun's harmful UV rays—a leading cause of fading in home furnishings. This dramatically slows the progress of fading to help keep your customers' homes looking beautiful. In fact, according to the Skin Cancer Foundation, window film is one of several recommended safeguards against UV damage.

Comfort When sunlight enters a room, the temperature rises and air conditioning starts working overtime. By blocking up to 79% of solar heat, 3M™ Sun Control Window Films help keep rooms at comfortable, moderate temperatures while helping to reduce energy costs.

Glare reduction Watching TV or using a computer in a sunlit room can be frustrating. By significantly reducing glare, 3M Residential Window Films can help people work and relax without the eyestrain from excessive light.

Privacy Most homeowners love the aesthetics and views of their windows, but also desire privacy. Our reflective window films can help homeowners enjoy enhanced privacy, day *and* night.

Protection against unwanted entry Made with thicker polyester and a more aggressive adhesive system, 3M™ Safety and Security Window Films can improve glass integrity on windows and doors to help deter unwanted individuals from entering.

Unique aesthetics With over 50 patterns, 3M™ Fasara™ Glass Finishes can be layered or used alone, allowing homeowners to achieve virtually unlimited design possibilities at a fraction of the cost—and all while maintaining privacy and natural light.
