

## Brett Cole

Brett Cole has been working in contamination control in the pharmaceutical, healthcare, life sciences and food/beverage market for over 20 years. His formal qualifications are in environmental microbiology and chemistry, and later, in occupational hygiene and toxicology. His experience has been in academic microbiological research, medical devices for high level disinfection, engineering controls for contamination abatement, materials handling, infectious and contaminated waste, and facility decontamination and remediation. He has worked in Australia, North America and Asia Pacific on many contamination projects for Beta-lactam site remediation, animal facility infection and infestation management, laboratory decontamination and even Ebola.
