Green Wave
SMOOTHIE POPS

Green Wave Smoothie Pops ARE:

- The first popsicles to incorporate nutrient-dense, dark-green leafy vegetables
- Naturally sweet, providing a low-calorie alternative to sugary frozen treats; made with **NO ADDED SUGAR**
- Blending retains the full benefit of the dietary fiber in the fruits and vegetables and also improves absorption of key nutrients from the first bite
- Dairy, soy and gluten free food
- A great option for athletes, providing energy (from the fruit and greens) and powerful hydration (from coconut water)
- A completely natural vegan treat, containing absolutely no artificial ingredients, additives or colorings

Nutritional Benefits:

Both flavors are naturally low in calories: **Kalelicious Pops** have 40 calories each while **Greena Colada** has 60 calories, but more importantly they are nutrient dense calories, not the empty calories found in processed snacks.

It's important to eat a rainbow of natural foods for a healthy diet. **Our ingredients are powerhouses of nutrition.**

On the Shelf:

- Our pops are sold in a box of four, 3-oz pops for a total of 12 oz per box
- Our four color box design allows for vertical or horizontal display
- Point of purchase materials available

Catch the Green Wave and be part of our commitment to helping parents and kids make healthy choices to enjoy an active, fun-filled life.
