Science and Engineering Summer Camps

- A summer day camp designed for youth ages 9-12 (by Dec. 31, 2018) with a different science or engineering theme each day:

Sport Science: Can you beat the competition? Understand the science of how your body and different equipment work during sport, so you can use your knowledge against your opponent in your upcoming game!

Food and Nutrition: Discover a whole new meaning of cooking. On this day you will use some unexpected ingredients, and a whole lot of science to create bubble gum and edible water bottles! Then you'll learn all about how your body digests your culinary creations.

Extreme Engineering: Are you ready for a challenge? You and your friends will use basic engineering principles to design, build, and test floating towers, egg bungee jumps, and a Rube Goldberg machine!

Zoology and Ecology: Manitoba is full of amazing animals and various ecosystems. Learn how these creatures interact with each other and impact your life. Ever wonder what was inside an earthworm, or how the food chain works? You'll find out all the answers on this day!

Paleontology: Go back 65 million years in time to learn all about dinosaurs, and how present day scientists discover and identify organisms that lived in the past.
