Science and Engineering Summer Camps

- A summer day camp designed for youth ages 9-12 (by Dec. 31, 2019) with a variety of STEM (Science, Technology, Engineering & Math) themes throughout the week.

Chemistry: Explore the diverse world of chemistry through everything from paper marbling art to solving the mystery of what's making your caribou herd sick to creating your own fire snakes.

Natural Disasters: Can you make a building survive an earthquake? Can you save the railway from being wiped out by a landslide? Natural disasters happen all around the world all the time. This day will take you on a hands-on adventure through all kinds of disasters.

Agriculture/Materials: A diverse day where you'll learn to build a dairy farm, germinate a seed, learn the science behind a tasty mud pie, and make your own reusable food wrap.

Codemakers: Are all robots the same? Not even close! These two days you will learn and play with several different types of robots as well as see if you have what it takes to code your way to surviving a zombie apocalypse.
