

## **Balsam Lake - E.coli Test Results - 2012 - Road Ass'n Funded Sites**

The following test sites are funded by individual Road Associations.

Test results indicate the number of colony forming units per 100 millilitres (#cfu/100mls).

Repeat tests are conducted by the lab using the same sample as a quality control measure.

Retests include resampling and are conducted for results over 50 cfu/100mls.
