

Life Technologies

Next-generation sequencing and digital PCR seminars

Learn about the latest advances in next-generation sequencing and digital PCR

Life Technologies provides a complete range of solutions for addressing 21st century genetic analysis challenges. See how we're advancing genomic research with the latest tools, from Ion Torrent™ next-generation sequencers to the new QuantStudio™ 3D Digital PCR System.

"Regulation of RNA Expression in Autism Spectrum Disorders"

Ryan M. Smith, Ph.D., Research Assistant Professor, Pharmacogenomics, Ohio State University

"The Path to a Novel HIV-1 Genotyping and Tropism Assay: From Selecting the Right NGS Platform to Clinical Validation" by: Miguel E. Quinones-Mateu, Ph.D.

Scientific Director, UH Translational Laboratory, University Hospitals Case Medical Center
Assistant Professor, Department of Pathology, Case Western Reserve University

"QuantStudio™ 3D Digital PCR System—performance of a next-generation fixed micro-well platform for digital PCR" by Todd Atkinson, Technical Specialist, Life Technologies

Please join us on Tuesday, June 11 at 1:00 to 3:00 PM

Seating is limited so please register today.

Location: Marriott Courtyard at University Circle
2021 Cornell Road, Cleveland, Ohio 44106

Register today at <http://lifetechnologies.com/nextgenseminar2013>
