clean pedi tubs

We don't use whirlpool spa chairs for pedicures at Bellacures. Research shows that when the pipes are not cleaned properly, bacteria, skin and hair particles gather up in the pipes and can cause horrifying, dangerous infections.

Our pedicure tubs have plastic liners that click into the tub. The liner is thrown away after each customer. This way, there is no cleaning process required, and you never need to worry if your pedi tub was cleaned properly.

b.clean pouch + sterilization

Bellacures provides a disposable pouch with supplies. Every time you are serviced, a new pouch will be opened for you!

We autoclave all our implements. What is an autoclave? It is a sterilization chamber that hospitals and dentists use to sterilize all metal tools. Our tools are packaged in a sterilization pouch before they are put into the autoclave, and a new sterilization pouch of implements is opened for each client.

You should know, just because tools are in a pouch does not mean they are sterilized. Once the package has been sterilized, the arrow on the bag turns from blue to brown indicating that the proper heat level was attained during the sterilization.
