Re: MidCoast Citizen's Complaint Guide (Draft)

This document was reviewed by our Planning and Zoning Committee and by the MidCoast Community Council in their regular public sessions. All comments were positive and everyone thought it is a great idea. Comments fell into two categories: (1) specific additions or minor corrections, and (2) slight changes of scope.

(1) The extra ideas included:

- a. Include or define numbers for barking dogs.
- b. Flooding
- c. Street light problems
- d. Airport noise
- e. Conflicts (various) with neighbors.
- f. Problem trees
- g. Unofficial "For Sale" car lots.
- h. Under "Litter , garbage, etc, " for the second column, put the SAM number 726-0124
- i. We received a letter from the CHP which I presume you received also.

(2) Scope changes (more printing on the back, still leaving addressing room)

- a. Many folks wanted to see HMB numbers.
- b. Can you expand the emergency numbers on the back to include Hospitals and other critical numbers.
- c. How about utilities, sewer districts and water districts?
- d. We wanted to print as much info as possible without reprinting the phone book.

We thank you for the effort you put into this pamphlet, since we think it will be useful to Coastsiders. We can review a final draft if you wish. When these are printed we can get them included in "Welcome Wagon" packets to get them in the hands of newcomers.
