

**ROLLAC**   
ROLLING SHUTTERS

Enjoy the comfort and security of rolling shutters  
**Commercial Applications**

Your property is  
your investment.

## How do you protect it?

Every year, businesses lose millions of dollars due to property damage. Although theft and vandalism are the leading causes, damage from heavy storms can be a big contributor as well.

Rollac Shutters manufactures rolling shutters that not only protect your commercial property from harm, they provide a wealth of additional benefits that you'll enjoy on a daily basis including:

**Storm Protection**

**Building Security**

**Energy Savings**

**U.V. Protection**

**Light Control**

**Noise Reduction**

**Privacy**

**Automated Control**

With over 30 years of expertise in the rolling shutter industry, Rollac has developed a custom fit solution for your business needs.

Clinic  
Department Store  
Fast-food Restaurant  
Food Court  
Hospital  
Kiosk  
Plant Nursery  
Safe Room  
Server Farm  
Stadium  
Hotel

# Hurricane Security

## Hurricane Approved Slats

Tested against impact and deflection. They come equipped to accept the End Retention Sidelocks.

## End Retention Sidelock

Sidelocks physically attach to the slat curtain and lock in to the rails, preventing curtain pullout.

## End Retention Rail

End Retention Rail uses a special channel that houses the curtain side locks.

## A Secure Combination

A combination of sidelocks that attach to the shutter curtain and a special rail that prevents the slats from being pulled out under high pressure.

Approved By:

# Building Security

## Single Wall Slat

Even with its light weight design the RLL59 retains its amazing performance. The single wall slat excels in outdoor protection.

## CFC Free Hard Foam Slat

Rollac's A200 hard foam is twice as strong as the standard foam filling found in regular rolling shutter slats.

How good is it? Try to scratch it with your fingernail. Now try to scratch it with a screwdriver... it's that strong.

Detail of the RLL59 Slat

Rollac's regular and hard foam slats. A denser slat makes for a more rigid curtain.

# Security Grilles

## Keep Merchandise Secure and Visible

Businesses want to be able to protect their property while presenting their merchandise after hours. Rollac's perforated grille protects valuables while still allowing customers and authorities to have a view into the inside.

## One Slat, Two Punch Styles

Rollac's security grilles offer two different punch sizes to suit your needs. For more visibility, the larger rectangle pattern is ideal. The smaller square pattern allows you to keep products next to the shutter without any hands slipping through. It's also possible to mix the two slat styles together for a custom application and look.

44% Visibility

15% Visibility

# Counter Shutters

## CFC Free Regular Foam Shutter

The A150 Counter Shutter solution has been designed for easy operation and integration. The small housing space required makes it easy to install with low visual impact. The aluminum foam filled profile has been designed for durability and the foam insulation gives it the necessary strength. This efficient design makes it a light weight solution that also allows for easy operation.

## Lexan Shutter

The clear lexan solution is a lightweight translucent shutter that creates a solid barrier without blocking sight in and out of a room. An excellent interior choice that prevents a claustrophobic feel of a completely closed in space.

Clear lexan shutters provide an open feel in a room where a physical barrier is desired.

# Shutter Control

Rollac has a wide variety of methods to operate your shutters. Because every installation is different, an authorized Rollac sales associate will help you design the right operator method that will fit your needs.

-  Control the entire building
-  Control sections of the building
-  Control individual shutters

Control each shutter independently, as a group, or operate all of the shutters in the building at once. Have complete control over your security with the touch of a button.

## Automation

- Motor with Switch
- Motor with Remote Control
- Motor with Manual Override
- Motor with Remote Control and Manual Override

## Automation Control Accessories

- Exterior Key Switch
- Exterior Key Pad
- Multi Channel Remote Control

## Manual Operation

- Pull Strap
- Strap Crank
- Gear Crank
- Spring Loaded System

## Towards Superior Technology and Higher Environmental Standards

Rollac Rolling Shutters is a leading manufacturer of rolling shutters. With more than 30 years of experience, we believe that technology and quality service are the driving forces behind our rolling shutters. We take pride in the fact that we are the only company in North America that manufactures rolling shutters from raw materials to finished solutions.

Using the latest technology at hand, all our solutions are engineered in house and suited to accommodate the American market. If you need a rolling shutter to protect from solar heat gain, a shield for security, or Miami Dade wind storm protection, Rollac Rolling Shutters provides the right solution.

Buildings consume 39% of all energy and are also the largest source of carbon dioxide emission in the USA. Therefore, we at Rollac strive to engage in environmentally responsible practices and pledge to integrate principles of sustainability into our rolling shutters and our day to day operations.

We consider it our responsibility to have a leading role in the industry and are proud to partner with experts and organizations that contribute to our knowledge of sustainability.
