ARROWHEAD

Directions:

To Mount On Wall:

1. DO NOT remove the masking tape that holds the string in place.
2. Hold the mounting template in the desired location against a wall leaving 12 inches of space between it and the ceiling and 6 inches to any side obstruction. Level the bottom edge. Place a sharp instrument through the marked mounting holes, marking a location on the wall.
Note: The proper height is one from which viewing and winding is comfortable.
3. Drill pilot holes. If the wall is sheetrock or plaster use the plastic anchors provided by drilling a 3/16" hole and driving the anchors into place.
4. Mount both sections of the sculpture using round-headed brass screws 1½" or longer.

2. Tie a loop in one end of the string provided and loop this over the hook on the right hand dowel in the lower section.
3. Pass the other end of the string under the pulley on the heavy weight and up and over the pulley on the back of the right-hand gear.
4. Cut the string about 12" below the bottom of the sculpture. Tie a loop in this end.
5. Pick up the light weight and pass the string under its pulley and up and over the hook on the left hand dowel in the lower section.

Install Cover:

1. Line up the three holes on the back of the cover with the three dowels on the lower section. Push the cover onto the dowels.

To Connect Strings:

1. Taped to the moving platform in the upper section are 2 strings. Turn the platform so the strings are along the bottom edge.
2. Untape the left-hand string from the front of the platform. (Do not remove the tape from the back of the platform.)
3. Place the loop in the string end over the small metal hook on the back of the left-hand arm.
4. Repeat for the right-hand arm.
5. Now remove the tape that holds the strings in place on the back of the platform.

To Wind:

1. Pull down on the left-hand weight until it reaches the floor.

To Start:

1. The sculpture should start automatically after being wound up. If it does not push the platform gently in either direction.

To Suspend the Weights:

1. Place the two weights on the floor below the sculpture, the heavy weight on the right and the colored sides forward.

Storage and Shipping:

Please save the shipping box and backboard-template to aid you when moving, storing or shipping your sculpture. The box can be collapsed for easier storage.
