

WOOD THAT WORKS

DAVE & MARJI ROY

CASCADE

Directions:

To Mount on Wall:

1. Remove sculpture and weights from from backboard and template.
2. Unfold backboard-template to full size.
3. Hold template against wall. Leave at least 2" between walls or ceiling. Make sure bottom edge is level.
4. Place a sharp instrument through the screw mounting holes, marking their position on the wall. The proper holes are labeled.
5. Drill pilot holes. If wall is plaster or sheet rock, use plastic anchors.
6. Mount the two parts of the sculpture using round-headed, bass screws $1\frac{1}{2}$ " or longer.

To Suspend the Wooden Ball:

1. Unwrap the wooden ball and string.
2. Hook the loop end of the string onto the small metal hook at the top of the upper piece.
3. Bring the ball and string around the pulley behind the swinging spiral wheel (see diagram) and up and over the pulley behind the fixed spiral wheel.
4. Place the string between the two wooden pegs on the back of the arm on lower member. The Ball should hang below.

To Suspend the Weights:

1. Place both weights on the floor below the sculpture. Place the heavy weight on the right.
2. Unwrap the string from the spool and place it over the pulley in the back of the pegged wheel.
3. Tie a loop in the right-hand string, bring this down through the heavy weight pulley and up to the small metal hook on the right.
4. Tie a loop in the left-hand string 12" below the bottom edge of the pegged wheel. Pick up the light weight and pass the loop under the pulley on the weight, then up and over the left-hand small metal hook.

To Wind:

1. With your right hand, hold the hook on arm of lower member away from pegged wheel. Raise the arm to a 2 o'clock position.
2. With your left hand, slowly pull down on the second weight string from the left. Hook the hook on the peg of the pegged wheel. repeat until the heavy weight is completely raised.

To Start:

1. Gently pull down on the ball until the upper spiral reaches the top of its arc.
2. Release the ball.

To Stop:

1. Gently stop the motion of the arm just before the hook hooks a peg.

Note:

Please save the shipping box and backboard to aid you when moving, storing or shipping your sculpture. The box can be collapsed for easy storage.
