Directions:

To Wind:

1. Push down on the left-hand side of lever A and pull the right-hand weight (light) down as far as you can.

2. Release the right-hand weight while still holding down lever A and raise the left-hand weight (heavy) until the light weight just touches the floor.

3. Release lever A.

To Start:

1. Turn the large pulley wheel (B) gently in a counter-clockwise direction until upper block C touches the rear spool on the largest brass wheel. Release B.
