

WOOD THAT WORKS

DIAGRAM

DAVE & MARJI ROY

Directions:

Pieces Included:

- 1 Sculpture
- 1 Light Weight
- 1 Heavy Weight
- 1 Spool String
- 1 Directions

To Mount on Wall:

1. Remove the sculpture and weights from backboard. Do not remove masking tape.
2. Hold the backboard in desired location against wall. Make sure bottom edge of backboard is level.
3. Place a sharp instrument through the mounting screw holes, marking their position on the wall. The proper holes are labeled.
4. Drill pilot holes. If the wall is plaster or sheetrock, use plastic anchors.
5. Mount the sculpture using round-headed, brass screws $1\frac{1}{2}$ " or longer.
6. Remove the masking tape.

To Suspend the Weights:

1. Place the heavy weight on floor to the right of the sculpture. Place light weight on the floor to the left.
2. Unwrap enclosed nylon fish-line and tie a loop in one end. Place this over the small, metal hook on the right-hand side of the sculpture. Pass the other end of the string under the pulley on the right-hand weight and up and over the small pulley on the back of the large wheel.

3. Tie a loop in this end of the string about 6 inches below the lowest point on the base of the sculpture.
4. Pick up the light weight, pass the string under its pulley and loop it over the metal hook in the center of the sculpture.

To Wind:

1. Raise the heavy weight until it is just below the sculpture and the light weight is touching the floor.
2. While still holding the heavy weight, turn the large wheel counter-clockwise until the crescent shaped ratchet piece is at the two o'clock position.
3. Slowly lower the heavy weight until the ratchet members lock and the weight is supported. Release the large wheel.
4. Make sure the string has not slipped out of the pulleys.

To Start:

Turn the front "S" members in a clockwise direction.

To Stop:

Stop the motion of the front spinning members.
