

# Minuet template

Dashed lines define horizontal and vertical lines.

One way to transfer this to a wall is to put a temporary top screw in place  
Hang a string from it with a small weight attached. Allow it to stop swinging.  
Measure down 6 1/2 inches. Mark the point.

Use a level to define a horizontal line at this point.

and measure over 8 9/16 inches and mark the second point.
