

Jester sculpture mounting hole reference.

Jester came with a hard mounting template to set the correct screw hole location and sculpture angle. This diagram shows the correct relationship between the mounting holes to set the sculpture at the proper angle.

Directions for using this template:

1. Start at the location for the top hole on the diagram.
2. Use a level or a weighted string to determine a true vertical line descending from that point.
3. Measure vertically down that line to point noted.
4. Use a level or a square to establish a horizontal line at that point.
5. Measure along that line to lower point.
6. Temporarily install the sculpture using those two points. Mark the other mounting holes with the sculpture in place.
7. Remove the sculpture. Install the appropriate anchors and permanently remount the sculpture on the wall.
