

FOR IMMEDIATE RELEASE

D4 Deepens Service offerings with the addition of a Cloud-based Document Repository Solution for Law Firms, In-House Counsel and Corporations

Adoption signifies increasing market demand of cloud based solutions for legal document scanning, storage and retrieval

D4, LLC, a national leader in litigation support and eDiscovery Managed Services to law firms and corporate law departments, today announced that it has added InfoPreserve's Cloud-based Legal Repository Solution to its solution set. D4's new offering allows clients to search, collaborate, manage and store digital documents securely in the cloud and access those documents anytime and anywhere. Additionally, customers utilizing D4's legal scanning services now have the option to have their documents delivered back to them in a highly secure, cloud-based repository.

"With the addition of InfoPreserve's solution, we can now offer our customers a secure cloud-based repository. Once in the cloud documents and emails can be searched, tagged and exported if necessary. The next step is to utilize it for conducting secure and defensible ESI collections," said Peter Coons, Senior Vice President, D4.

"D4's new Cloud-based Legal Repository makes it incredibly easy for law firms and lawyers to store, retrieve and share highly sensitive documents that may be subject to legal hold and discovery", stated John Holland, CEO of D4. Holland continued "The legal industry deals with incredibly high volumes of documents, which continue to grow exponentially, that need to be securely stored, but also easily accessed and shared with different parties".

"We are excited to enter into a strategic partnership with D4, a national leader in litigation support and eDiscovery," said John Chapman, CEO of InfoPreserve. "We look forward to continuing to grow our relationship as we explore additional synergies between our technology and the exceptional service and expertise D4 provides to their customers."

About D4

D4, LLC is the national leader in litigation support and eDiscovery Managed Services to law firms and corporate law departments. D4 covers the spectrum of the Electronic Discovery Reference Model (EDRM), from identification and preservation of data through forensic and targeted onsite data collection and from data analytics and defensible search methodology through hosted review and production. D4 assists attorneys in litigation response planning, strategies for negotiation of scope and meet-and-confer, computer forensics, expert testimony, cost reduction litigation support projects and in corporate law department operations. The company was founded in 1997 and has offices throughout the country. Visit www.d4discovery.com for more information.
