FOR IMMEDIATE RELEASE

InfoPreserve Releases Software to Enable File Sharing & Collaboration

Version 3.4 with new Implementation Wizards with enhanced File Sharing capabilities to deliver Searchable, Secure and Simple Document Management Software for Enterprise Customers

ROCHESTER, N.Y. – January 31th, 2013 - InfoPreserve, Inc., a leading supplier of intelligent document storage and management cloud solutions, today announced a significant software upgrade to its innovative system to drive file sharing and collaboration for enterprise businesses. InfoPreserve reveals its “implementation wizards for installations’ and its new enhanced features for file sharing and collaboration. The new InfoPreserve implementation wizards now allow new customers the ability to be up and running in 3 to 5 clicks. An added feature we have provided enhances tools for file sharing and collaboration increase flexibility of our custom tags and meta tags as well as supporting large data files fast and efficient. This release also support more email clients such as Outlook Express, Windows Mail, Windows Live Mail, Thunderbird and MAC OSX Mail that uses the .eml file format as well as supporting API’s

“This release builds upon our capabilities to support large files, rich graphical reports for compliance and audit reporting, mobile applications for file sharing, collaboration and searching documents quickly and efficiently, anywhere and anytime”, according John Chapman, CEO at InfoPreserve. We continue to invest in three main areas to help our customers grow with services via our private Cloud: 1) Ingesting and accessing documents automatically, 2) Searching and sharing documents instantly for individuals and for team collaboration and 3) Online storage, preserving/archiving documents in a secure private

cloud environment. More information, including information on a demo or free trial, is available at www.infopreserve.com.
