

Powerful, seamless, simple and secure - Designed for today's business pace!

Manage your business in a Private Cloud. Your ROI starts the first day you and your staff use YourBizsafe™

- Search entire documents with unstructured data – Find it no matter what file it's in.
- Enjoy quick and easy forensic level search functionality – Find anything!
- Find files uploaded by individual, date or file type – Organized even if you are not.

- Store your data in our private Cloud and access files via a secure, encrypted connection
- Benefit from built-in permission levels for confidential information
- Track all changes via our audit reporting

- Upload, search, view, preserve and download your company documents
- Access and upload from your tablet, smartphone or laptop. Take a photo of a document, upload - it's searchable too
- Leverage our APIs to integrate into your different systems and workflows – “we play nice with others.”

A private Cloud truly designed for business today

A major concern facing most independent business owners is keeping up with technology and using it to stay ahead of the competition. Most of us do not have an unlimited budget or a large IT staff to keep your business on the cutting edge.

Data is your most important asset, but most companies' records are unsecure and stored on desktops, drives and CDs all over the office. Your business is at constant risk from lost files and lost productivity, looking for information or facing fines you may have for being in non-compliant. Huge fines could cripple or close you down.

YourBizsafe™ advantage, is an information storage system that allows you to manage your data and can keep everything secure in a private Cloud. No need for an expensive server, extra staff, costly licenses or being a tech geek yourself. It's easy. We offer automatic uploading, outstanding security, and the ability for your staff to collaborate on their laptops, smartphones or tablets too. Searchability allows you to save time and labor with the ability to find anything, even if you don't know the file's name. Our forensic search let you find anything and will show it instantly.

The YourBizsafe™ Solution

How we designed an intelligent document management solution that enables you to:

Uploading digital assets and documents quickly and efficiently for file sharing and storage

Automatic – Your files will upload even when you forget

Scan your own documents, upload and our system will OCR everything (optical character recognition), making them searchable.

Searching and retrieving documents with a single view – it's so easy to find and manage your digital assets

Exceptional viewing and upload controls. Easy to collaborate, but strict controls keep data safe

Preserving, integrating and exporting documents

SaaS - No servers or staff just a small monthly fee

Works with all mobile devices: Who sits in the office? You don't. YourBizsafe™ lets you keep your office in your pocket.

It's easy just sign up online, visit www.yourbizsafe.com

At YourBizsafe™, we understand it may be difficult find a solution that is easy to use, understand and your staff would accept. We've designed one that can be incorporated into your existing systems and processes with ease. It's also flexible enough to grow with your organization over time.

Because our solution is based on a Software as a Service (SaaS) model, which means no upfront capital and information is stored in our secured private Cloud. Installation is simple and your users will be up and running in less than 30 minutes.

You'll have all the tools you need for document review and discovery. Our focus on record and content management aligns with the needs of your ever-expanding role: Human resources management, legal documents and financial records.
