- Share with family, friends in a secure environment anywhere you can connect.

A private Cloud truly designed for you!

A major concern facing most people is what do I do with my data, files, and records? I have files and documents that are important to me! I know people who have had computers crash and lost everything! What if something happen to my computer or my house or what if I am out of town and I need important information? I forget to back up all the time....what if I lose my laptop? How do I recover my data?

These are some of the most common thoughts that people have and what if you know nothing about computers, Clouds or storage. How do you know what is good or bad? You don't until you need it and you data is not there or you can't use an over complicated non-intuitive system.

Data is your most important personal asset but most of your files are unsecure and stored on desktops, drives and CDs - all over the House. Move them to the Cloud.

You are at constant risk from lost files and wasting time looking for information. Searchability - we help you save so much time and labor with the ability to find anything, even if you don't remember the files name. Our forensic search lets you find anything and will show it instantly.

YourSkysafe™ allows you to manage your data and keep everything secure in a private Cloud. No need for an expensive server or being a tech geek yourself. It's easy. We offer automatic uploading, outstanding security, and the ability for you to share or collaborate documents with family and friends on their laptops, smartphones or tablets, too.

The YourSkysafe™ Solution

- Uploading** documents quickly and efficiently for file sharing and storage
- Automatic Upload** your files - even when you forget to
- Searching and retrieving** documents with a single view. It's so easy to find and manage your digital assets
- Upload and search** – all documents become searchable instantly
- Exceptional viewing and upload** controls make it easy to collaborate, but strict controls keep data safe
- Preserving, integrating and exporting** documents is easy
- SaaS** - we take care of everything for you for a small monthly fee
- Works with all Mobile Devices.** Who sits at a desktop all day long? **YourSkysafe™** will let you have your files in your pocket

YourSkysafe™ offers a solution that lets you keep track of important documents, with your parents, a child away at school, family members - no matter where they are on the globe.

Your medical records can be viewed anywhere and even your passport images are backed up for emergency use. A system that is great for people who travel or someone who is a long distance caregiver.
