RATIONALE

West Greenwood Primary School aims to protect students from exposure to inappropriate online material or activities by adopting protective online behaviour and being proactive in teaching students to interact safely and appropriately in an online environment. In conjunction with the Education Department, West Greenwood makes every reasonable effort to achieve this by educating and informing students and parents.

The internet is an essential element in 21st Century life for education and social interaction. The purpose of internet use in school by students is to promote improved student outcomes. The Western Australian Curriculum through its Technologies Curriculum and ICT Capabilities, requires children to learn how to locate, retrieve and exchange information using ICT, and to become innovative, creative and critical users of technologies to problem solve. Consequently, teachers need to plan cross curricular programs that integrate the use of ICT and web based resources, including e-mail to enrich learning activities.

GUIDELINES

Responsible and ethical student use of technology is a key element in West Greenwood Primary School's approach to embedding digital technologies across learning areas.

Expected behaviours in using technology are explicitly taught to students at the beginning of each year and classes display an iPromise poster of agreed behaviours and expectations. **(APPENDIX 1)**

Students and/or parents will sign an online/device use contract and staff will not allow students to access digital technology without a signed agreement. **(APPENDIX 2)**

Staff will embed the use of technology in their planning to foster innovation, creativity, critical thinking and problem solving for students.

We focus on ensuring students are cyber safe and students agree only to access online websites related to the content being taught. Students agree also to keeping their passwords private and to follow directions of staff when using technological equipment.

Staff will provide appropriate supervision (within line of sight and in close proximity to the teacher) for students using the Internet and other online services at school.

Misuse of technologies by students will be dealt with using the school behaviour steps. Serious breaches will fast track the behaviour steps and administration and parents will be informed immediately.

PARENT/GUARDIAN

I understand that the Internet can provide my child with valuable learning experiences. I also understand that it gives access to information on devices around the world and that a very small part of that information can be offensive, illegal and/or dangerous.

I accept that while teachers will always exercise their duty of care, protection against exposure to harmful information should depend finally upon responsible use by students. I have discussed the Internet usage agreement with my child.

I believe _____(Name of student) understands this responsibility and I hereby give permission for him/her to access the Internet under the school rules. I understand that students breaking these rules will be subjected to appropriate action by the school. This may include loss of Internet access for some time and/or contacting me.
