

FEDS 201

February, 2018

The Rochester Robotics team (The FEDS) has been working hard during the build season. Each group has been helping develop different mechanisms to fit this year's game in time for the first competition on March 8th. At the same time, the FEDS have been striving to go for the Chairman's Award for their 20th anniversary, an award that highlights a team's contributions to its community and allows the winner to automatically go to the World Competition. This season, the safety team has revamped the FEDS safety protocol to ensure the highest level of safety possible throughout the build season, during travel and at competitions.

The safety team created interactive Jeopardy, Kahoot and Quizlet games to ensure safety competency across the entire team for them to apply further into the community.

Students continue to write an essay describing how our team works to expand access to STEM education throughout the community as part of the Chairman's application.
