

FEDS 201

Agents of Change: Field Report

FEBRUARY 2019

Junior Mentors

The FEDS have been lucky enough to inspire young students and mentor engineering specialties for over 20 years; and many of those who were once part of the team come back to help others enter the world of FIRST. This year, Nishchay Kulkarni, Luca Wagner, Kenzie King, Luis Rosado, and Rohan Singh are college students from Oakland University and Michigan State who are mentoring on our team. They were all part of the FEDS and fostered their passion for science through the team. Our team is proud to have encouraged so many alumni to pursue STEM careers while helping their community.

Upcoming FEDSraisers!

The FEDS are holding a fundraiser on Friday, February 22nd, 4-8 PM, at Panera. The flyer, found on any of our social media pages, must be shown and our team will receive a portion of the sales.
