

Does your son have difficulty performing:

- sports activities such as jumping, catching, riding a bike;
- everyday activities such as tying shoe laces, dressing?

We are looking for boys between 8- to 11- years to help us out by completing some fun activities as part of a PhD project.

WHAT DOES PARTICIPATION INVOLVE?

We need you to bring your child to The University of Notre Dame for 2 sessions:

- In session 1, your child will be physically active (e.g., jumping and balancing);
- In session 2, your child will perform simple activities that involve thinking about and moving small objects.

BENEFITS OF PARTICIPATION

- You will get a professional assessment of your child motor proficiency;
- You will help us help kids who find running and jumping hard;
- You will go into a draw to have a chance to see amazing pictures of your child's brain at work.

DO YOU WANT TO KNOW MORE?

For more information about the study email PhD student Ranila Bhoyroo on ranila.bhoyroo1@my.nd.edu.au or call on **0426976713**.
