JIM

CURRY'S HYBRIDS take this opportunity to thank our good friends for their fine support for the past 25 years. The oldest hybrid seed corn company in South Dakota, CURRY'S HYBRIDS have been selling the best hybrids available since 1935. J. J. Curry pioneered hybrid seed corn in South Dakota and sold many farmers their first hybrid corn. From this early day beginning CURRY'S HYBRIDS now sell seed corn in 15 counties in Iowa, Nebraska, and South Dakota.

The fourth generation of Currys is also engaged in diversified farming in the Elk Point area. Since the first Curry homesteaded a few miles south and east of Elk Point nearly 100 years ago, Currys have enjoyed being a part of the Elk Point community. We are confident the future holds good fortune for the folks of the Elk Point area.
