TURNING POINTS

TURNING POINTS in design have changed history and individual lives. Whether game changers like the invention of movable type or the Macintosh computer, or critical factors such as an influential teacher or a pivotal internship, change is a constant for us all. Come join fellow designers and share your personal experience or your impression of a particular turning point in design history.

You'll have about 10 minutes, with visuals if you like, and additional time for Q & A. Let us know if you plan to speak when you sign in at the door.

It's your night—the mic is open and the stage is set!

COMING IN AUGUST: The History of the Graphic Novel presented by Benn Ray at Atomic Books

SHAG is sponsored by Dolphin Press & Print at MICA and MICA's programs in Graphic Design and Illustration.
