Demographics

Population Characteristics

The Census Bureau’s most recent intercensal population estimates indicate that between 2000 and 2008, Colfax County’s population decreased by 4.33 percent or from 10,441 people to 9,989 people. This figure compared to a statewide population growth rate of 4.22 percent. The number of people from 20 to 24 years of age changed from 590 in 2000 to 627 in 2008, an increase of 6.27 percent, and the number of people from 25 to 34 years of age decreased by 16.72 percent. As seen in Diagram II.19.1, people younger than 25 comprised 38.25 percent of the population in 2008, while individuals aged 55 and over comprised 23.72 percent of the population in Colfax County. This figure compared to statewide numbers of 35.5 percent of the population below the age of 25 and 24.4 percent aged 55 and over.

Between 2000 and 2008, the white population decreased by 5.98 percent, while the black population increased by 358.33 percent. The Hispanic population changed from 2,732 to 3,869 or by 41.62 percent. Table II.19.1 presents the details of these population characteristics.

Population Migration

Total population change is a combination of births, deaths, and the net migration of those arriving in and leaving the state. The result of births minus deaths is termed the *natural increase*. As calculated from data seen in Table II.19.2, at right, from April 2000 to July 2008, Colfax County's natural increase was estimated to be 810 people. Colfax County has been experiencing net out-migration, with 1,262 persons leaving the county in the last eight years.¹²⁸

1980 Population	9,890
Natural Increase 80-90	283
Net Migration 80-90	-1,034
1990 Population	9,139
Natural Increase 90-00	280

2000 Population	10,441
Natural Increase 00-08	810
Net Migration 00-08	-1,262
2008 Population Estimate	9,989

The Nebraska Department of Motor Vehicles provides another source of information about migration trends. These data represent the net of driver's licenses: those licenses surrendered to other states when Nebraska residents move outside of the state and those licenses issued to new residents of Nebraska. Known as the driver's license exchange data, it shows that net change in Colfax County increased from 23 persons in 2007 to 110 persons in calendar 2008, with an additional net movement of 56 in the first six months of 2009. The driver's license total exchanges for the last eight and one-half years are presented in Table II.19.3.

¹²⁸ Net migration includes a residual, a change the Census Bureau has not attributed to any cause.

¹²⁹ The Department of Education provided the 1992 through 2002 data on October 4, 2002. The 2003 through 2009 counts of school age children do not appear to have the same methodology that was used to count school age children between 1992 and 2002.

Economics

Labor Force

Labor force and employment statistics were derived from the Bureau of Labor Statistics (BLS). The labor force in Colfax County, defined as the number of people working or actively seeking work, increased from 5,680 in 2007 to 5,694 in 2008. The total number of people employed changed from 5,557 in 2007 to 5,545 in 2008. The unemployment rate for the county, at 2.6 percent, compared to the state unemployment rate of 3.3 percent for 2008. Unemployment in the county experienced a change of 0.4 percentage points between 2007 and 2008. These unemployment rate data are presented in Diagram II.19.2.

Employment and Personal Income

The Bureau of Economic Analysis (BEA) also measures employment, defined as the total number of full- and part-time jobs. In 2007, the most recent year for which data are available, Colfax County recorded 6,563 jobs, a decrease of 74 jobs since 2006. Diagram II.19.3 presents total employment for the county from 1969 through 2007.

As seen in Diagram II.19.4, average earnings per job in the county were \$34,338 in 2007, while Nebraska and U.S. average earnings per job were \$43,191 and \$50,782, respectively.

Total real personal income in 2007, comprising all wage and salary earnings, proprietorship income, dividends, interest, rents and transfer payments, was \$308,551,000, an increase of 5.16 percent between 2006 and 2007. Real per capita income was \$31,160 that same year; this compared with a statewide average real per capita income of \$38,712. Table II.19.6 provides further annual data for the years 1969 through 2007.

The U.S. Census Bureau defines poverty as a situation in which total family income is less than a threshold amount based on the Consumer Price Index (CPI), family size, number of children, and the age of the householder. According to the Census Bureau’s Small Area Income and Poverty Estimates Program, the number of individuals in poverty decreased from 1,112 in 1998 to 926 in 2008, with the poverty rate reaching 9.4 percent in 2008. This compared to a state poverty rate of 10.6 percent and a national rate of 13.2 percent in 2008. Table II.19.8 presents poverty data for the county.

The U.S. Census Bureau reports building permits issued by permit issuing agencies, as well as valuation of building permits by county annually. Single-family unit construction usually represents most residential development in the county. Single-family building permit authorizations in Colfax County decreased from 14 in 2007 to 7 in 2008, with the average value of construction reaching \$146,429. The statewide average in 2008 was about \$155,100. This value excluded the cost of the lot and infrastructure improvements. These changes in residential permit activity compared with a decline in population of 452 people

Housing Characteristics

The Nebraska Department of Revenue, Property Assessment Division (PAD) provided a database of residential property transactions over the last ten years. The property transactions are primarily related to existing buildings, with very little new construction data. Nevertheless, during fiscal years 1999 through 2008, there were a total of 991 property transactions in Colfax County. Of these, there were 960 single-family transactions during this ten-year period, as seen in Table II.19.12.

¹³³ Data Source: U.S. Bureau of Census. Note: Permits do not necessarily translate into a precise and full count of housing production. Some dwellings permitted are never constructed. As well, some dwellings may be built in areas that lack a building permitting process, have a lax permitting process, or have insufficient oversight of construction activity.

The PAD data also has descriptions of the quality of the building, which refers to the grade of materials and workmanship used in the original construction of the dwelling. Of the 491 single-family home property transactions concerning units built before 1930, 1.4 percent were of low quality and 54.4 percent were of fair quality. Conversely, of the 6 homes built from 2001 through 2008, 0.0 percent were of low quality and 16.7 percent were of fair quality. Table II.19.13 provides details on the quality of these single-family residential dwellings by vintage of construction.

In regard to the condition of residential dwellings, of the same 491 single-family homes built before 1930, 37.7 percent of the homes were worn out or badly worn, and 55.4 percent were in average condition. Table II.19.14 provides details of the condition of single-family residential dwellings by year built.

Single-family home prices from the PAD database also indicated a general increase in average home prices and average floor area for newer homes. Single-family home prices in Colfax County increased from \$46,869 for homes built before 1930 to \$184,125 for homes built from 2001 to 2008.¹³⁴ However, homes built from 2001 through 2008 are also larger and average 1,869 square feet per unit. Table II.19.16 provides additional details, by year of construction, for single-family homes.

¹³⁴ When a manufactured home is placed on a permanent foundation, the Assessor considers the property a single-family dwelling. Hence, these property transactions are seen even though a single-family new construction permit was probably not issued for the manufactured home.

Survey of Rental Properties

During fall 2009, a telephone survey of rental property managers throughout Nebraska was conducted. Table II.19.17 presents some basic statistics about the completed surveys from 2002 through 2009 in Colfax County. Completed surveys increased from 8 in 2008 to 12 in 2009. The vacancy rate for all units changed by 9.09 percentage points between 2002 and 2009. While the vacancy rate for all units was at 17.19 percent in 2009, respondents indicated that their units are filled up in an average of 29.63 days, a change of 17.37 days since 2002.

Year	Completed Surveys	Total Units	Vacancy Rate	Absorption Rate
2002	5	210	8.10	46.99
2003	6	215	15.35	16.00
2004	6	229	19.21	125.6
2005	10	189	8.99	60.10
2006	12	285	14.04	56.47

2008	8	159	2.52	53.00
2009	12	192	17.19	29.63

Of the 192 units managed in Colfax County during 2009, 163 were apartments.

Of these, 33 were vacant, which equated to a vacancy rate of 20.25 percent. Table II.19.18 provides the breakdown of units by type and availability.

Type of Units	Units Managed	Available Units	Vacancy Rate

Apartments	163	33	20.25
Mobile Homes	0	0	.
Not Sure of Type	0	0	.
Total Units	192	33	17.19

Of the 12 completed surveys, 3 had a waiting list at their facilities, with the total waiting list size at 14 people. Units with rental assistance comprised 52.08 percent of the total number of units managed in the county. These data are presented in Table II.19.19.

Attributes of Completed Surveys	Number of Responses
Units with Rental Assistance	100
Have Wait List	3
Waitlist Size	14

The survey respondents were asked to rate the need for new rental units and the need for rehabilitation of existing units on a scale from 1 to 5, with 1 indicating no need and 5 indicating extreme need. While some respondents said that they did not know, 36.36 percent indicated that there was no need for new construction. The ranking of need for rental rehabilitation was more moderate, as seen in Table II.19.20.

Degree of Need	Need for New Construction	Need for Rehabilitation of Existing Units
1 = no need	4	2
2	2	.
3	2	1
4	2	2
5 = extreme need	1	5
