

Certificate in Program and Portfolio Management

5 Days

5 Days 60 PDUs

The Executive Program in Program and Portfolio Management is designed based on the 2nd edition of PMI standards - The Standard for Program Management and Portfolio Management. It is to equip senior executives with advanced portfolio management skills required to manage complex project-based organizations. With a focused curriculum taught by skilled project management practitioners, the program enables students to acquire top level project management competencies and apply them immediately to their career.

The beauty of this program is that upon successful completion, participants will be awarded 60 PDUs (professional development units) recognized by PMI. This is one of the reasons why this program is so popular amongst PMPs. You get to upgrade your skill sets in program and portfolio management, and at the same time earn 60 PDUs for PMP re-certification.

Prerequisite:

Pre-course preparation is required prior to attending this program.

Target Audience:

Senior executives, project managers, program managers, program directors, and PMPs who want to make significant contributions to their organizations and their own careers by managing projects, programs, and portfolios that can make a positive business impact.
