

ITIL® V3 Foundation Program Certification Program - 3 Days

Course Overview

ITIL® is a set of best practices guidance that has become a worldwide-adopted framework for Information Technology Services Management (ITSM) by many Public & Private Organizations. Since early 1990, ITIL® has been evolving from focusing on Functions and Processes under versions 1 and 2 to focusing on the Full Service Lifecycle Management under version 3.

In addition to the existing benefits of aligning IT goals and objectives with the business, improving quality and reducing cost of operation; ITSM and ITIL® V3 now emphasizes the following areas:

- Assist in transforming IT Service Management onto a strategic business asset
- Assist in defining and managing the complete lifecycle of IT Service Management Process
- Provide guidance on the development of Services Strategy, the development of Service Design, the Transition of Services from current to desired state, the Implementation and the Continuous improvement of the those Services

This exam-preparatory course provides comprehensive coverage of foundation concepts within the IT Infrastructure Library (ITIL) V3. Through lectures and practice exam questions participants explore the concepts of good practice in IT Service Management based on the ITIL® V3 Framework.

Included in this course is the ITIL® V3 Foundation formal certification exam.

Duration

Three days

Delivery Methods

- Instructor led Classroom environment
- Virtual Web-based

Audience

IT professionals interested in understanding the content and concepts of the new ITIL® V3, as well as understand the differences with previous ITIL® V2

- Executives and key stakeholders
- Process Owners and Managers
- Senior technical and operational staff
- IT professionals and Consultants
- IT customers

Prerequisites

- General IT knowledge
- Preferably ITIL® awareness

Program Objectives

An effective lecture designed at achieving a clear understanding the new ITIL® V3 Best Practice and Service Management lifecycle model

- To provide participants with a strong understanding of the ITIL® V3 Service Lifecycle approach, Service models and framework, ITIL® common language, processes definitions and relationships, benefits and goals.
- To provide participants a firm foundation in IT Service Management best practices, the knowledge and pre-requisite to prepare for the ITIL® V3 Foundation Certification exam.

Program Contents

- Overview of the drivers for ITIL® V3
- Key differences between ITIL® V2 and ITIL® V3 - What are the major changes?
 - New concepts, definitions and terminology
 - Key processes and functions

- Service "V" model
- Continual Service Improvement model
- The need for IT Governance and control
- Process development characteristic and guidelines

Basic concept, objectives and activities of:

- Service Portfolio Management
- Service Level Management
- Incident Management
- Change Management
- Demand Management
- Financial Management
- Service Catalogue Management
- Availability Management
- Capacity Management
- Supplier Management
- Information Security Management
- IT Service Continuity Management
- Service Asset and Configuration Management
- Release and Deployment Management
- Event Management
- Problem Management
- Request Fulfillment
- Access Management
- The 7 step improvement process

Overview of the functions

- Service Desk
- Application Management,
- Operations Management
- Technical Management

Organization structure

- Key roles and responsibilities
- Technology and Architecture considerations
-

Program Material (handout)

- This training program includes the following as reference documentation:
 - Program slide presentation
 - Exam study guide
 - ITIL® V3 acronyms and glossary
 - Sample examination questions and answers

Simulation and practical application

- We provide the students with real life experiences; we use the client issues and problem as “Case study” example for the purpose of discussion to show the value of using best practice.
