* Data is by individuals screened by the brigada and is not by household. Percentages and numbers represent the response to the question or test result divided by the total number giving a response to the question or having the test done. Persons screened were not the same each year.

** Malnutrition is defined as BMI < 20 for adults and less than the 25th percentile for age in children. MUAC/OFC was used to determine malnutrition in children 3 and under with a ratio of less than 0.31 considered malnutrition. Overweight is defined as BMI > 25 in adults age 19 and over.

*** Anemia is defined as Hb <11gm in girls <12 yrs and boys <14 yrs; Hb <12 in females 12 and over; Hb < 13 in males 14 and over.

****Iron Deficient is defined as zinc protoporphyrin to heme ratio (ZPPH) >80mol/umol; Borderline Iron is defined as ZPPH >60 and ≤ 80 mol/umol
