

Get Your Ham Radio License in Just One Day!

Every Month in Tracy or Stockton
Visit www.hamcram.org for details

Our "HamCram" Technique has a Better Than 90% Pass Rate

You can get your Amateur Radio License in a single day using our proven technique. No Morse code test is required!

Thousands have gotten their licenses at our events by studying actual questions and answers, some of which will appear on the FCC exam given at the end of the day.

No memorization is required. With the HamCram technique the answer that "looks right" usually is. More than 90 percent of students pass their license exam on their very first try.

This is NOT a ham radio training course. You will not understand ham radio when you complete HamCram. You will, however, be licensed and able to learn from other hams at your own pace.

We encourage HamCram participants to line up a ham mentor in advance, if possible.

If you have ever wanted to get your license (or know someone who should), now's the time!

HamCram is an easy way for emergency workers (paid and volunteer), CERT team members and other who might use Amateur Radio in an emergency to get their licenses.

It is also an excellent way for current hams to help family members their licenses.

HamCram is for persons seeking their first license (Technician Class) as well as current hams seeking to upgrade from Technician to General Class.

Cost for the one-day event is \$30 and preregistration and prepayment is required. Because of limited space we cannot accept walk-ins.

We look forward to welcoming you to Amateur Radio!
