

Don't Get Fooled During A Risky Economy

In a busy housing market, people will say and promise almost anything to get your business. This is a fact with some businesses today. But also a fact is that a sweet deal price could cost you a lot more than you bargained for. Did you know an unpaid bill by a contractor for products installed on your property or an injury lawsuit by their "employee" could bring a lien on your property? Unfortunately, these are the times we live in.

The landscape industry is famous with stories of MIA contractors and broken contracts. Asking these important 'up front' questions will lower your apprehensions and raise your comfort level during and after the projects completion.
