

APPENDIX I

Herbert Allingham's Annual Output Titles and publications traced 1886-1937

Serial stories: In the following table the titles of serial stories are indicated in bold italic type. They may be cross-referenced against the publication record for individual stories in Appendix II.

OT indicates a serial story's original title. A number in brackets identifies the story as a first publication (1) or as a subsequent reprint.

Short stories: Subsequent titles of short stories and information about reprintings are included in these entries.

Story series: Story series are indicated in italic type. The number of stories in a series is listed, not each individual title.

The location column records whether a story, or any part of it, exists in Allingham's archive. If it is not in the archive BL = British Library (St Pancras), Colindale = the Newspaper Library at Colindale. Not traced = clear mention of the story and attribution to Allingham can be found in correspondence or in story titles but no text has as yet been located.

Undated, untraced titles are not included even where fragments exist in the archive.

Em Allingham's work has not been included here. Neither have the few examples of Claude Allingham's stories which exist in the archive. Advertising copy and leading articles have not been included. A list of Em Allingham's serials may be found at the end of Appendix II.

DATE	TITLE	TYPE	PUBLISHED	LOCATION
