Dabney M. Ewin, M.D., F.A.C.S. is generally considered to be one of the masters of clinical hypnosis. Furthermore, he is a most warm and engaging presenter. His style of clinical hypnosis is gentle, pragmatic and utilizes a person’s inherent ability to enter trance in a manner that typically elicits minimal resistance. Dr. Ewin is able to help his patients rapidly deepen and use the natural hypnotic states that accompany a wide range of physiological and psychosomatic conditions. His methods of performing simple trance inductions with patients in distress, accompanied by straightforward descriptions of the process to his students, clarify the uses and benefits of his approach and help participants put newly learned resources into clinical practice. His wisdom about people from balanced biological, emotional and interactional perspectives is profound, based on a long lifetime of keen observation, study and practice.
FRIDAY WORKSHOP

Hypnosis with Psychosomatic Conditions
2:00 – 4:00 PM • Lifeworks South
3700 S. 1st Street, Austin, Texas 78704

DESCRIPTION
This Friday afternoon lecture is considered one of our quarterly CTSCH meetings and clinical presentations. This lecture is complimentary for all CTSCH members, $20 for non-members. Qualified students can attend for $10.

In this 2-hour event, Dr. Ewin will present clinical material on the use of hypnosis with asthmatic conditions, shingles, and other skin conditions. It will also include an informal storytelling session weaving together the history of how he became so interested and involved with hypnosis. Dabney will share experiences he had with his uncle, who was a lay hypnotist in Nashville holding séances and doing anesthesia for selected surgeons.

LEARNING OBJECTIVES
At the conclusion of the presentation, participants will be able to:

1. Describe at least two example of a hypnotic induction.
2. Understand the basic application of the induction method to skin conditions and asthma.

Registration will be at the door starting at 1:30 PM. Please RSVP for this event by contacting George Glaser, LCSW, CTSCH Secretary, at 512-371-9418, or by email at george@georgeglaser.com

SATURDAY WORKSHOP

Ideomotor Signals for Rapid Hypnoanalysis in Behavioral Medicine
9:00 AM–5:00 PM • Doubletree Guest Suites
303 W. 15th Street, Austin, Texas 78701
512-478-7000

DESCRIPTION
Ideomotor signals are just another form of body language that may be used for communication with the unconscious mind. In this Intermediate-Advanced workshop, patient/clients can be taught how to use them to express feelings and answer questions without speaking. We will discuss theory, body language in general, how to set up the signals, and how to interpret them. After demonstration and practice with each other, we will review the seven common causes of psychosomatic disorders, with color slide examples of each. Then we will review how ideomotor signals can quickly help identify the most significant psychological factors in an individual case, to confirm or deny acceptance of a suggestion, call up an ego state, or review subconscious imprints of information that does not come up in the conscious history.

This advanced workshop format includes didactic presentations, video and live demonstrations, case presentations, skill building exercises and group discussions.

This program is approved for 6 hours of advanced training that will count towards the requirements for ASCH membership and certification.

SCHEDULE & CONTENTS
9:00 No agreement on definition of hypnosis. Poem of six blind men.
Text vs Context. The clinical use of Sperry’s Nobel Prize. How the cerebral hemispheres complement and confuse each other, and the clinical value of learning to “Listen in Literal.”
Special questions for a psychosomatic intake anamnesis (history).
10:30 Break
10:45 Translating a hypnotic history into a diagnosis. Erickson taught us that “The symptom is a solution,” and when we discover what it’s a solution to, the treatment is to find a better way to solve the problem.
Techniques for setting up good ideomotor and ideosensory signals.
David Cheek’s seven common causes of psychosomatic disorders, and their elicitation with ideomotor signals. Each cause is treated differently.
12:00 Lunch (on your own)
1:30 Practice setting up and using ideomotor signals, and silent hypnoanalysis.
3:00 Break
3:15 Coue’s Laws and their practical application.
Video of hypnotic treatment of a painful scar with long-term follow up.
Closing remarks, Q & A, evaluations.
5:00 Adjourn
LEARNING OBJECTIVES
At the conclusion of the workshops participants will be able to:
1. Explain how patients/clients can communicate with ideomotor signals.
2. Name the seven common causes of psychosomatic disorders.
3. Demonstrate the use of ideomotor signals as an adjunct to hypnoanalysis.

QUALIFICATIONS
The Saturday workshop is an advanced event open to licensed mental health and medical professionals with prior hypnosis training through ASCH, SCEH, CTSCH, the Milton H. Erickson Foundation or institutes, or other ASCH component societies. Other training programs will be considered on an individual basis. Please contact us with any questions about whether your training qualifies you to attend.

CONTINUING EDUCATION
Certificates of Attendance will be provided. Continuing education credits are offered for social workers, Texas psychologists, licensed professional counselors, and licensed marriage and family therapists. The Saturday program is approved for 6 hours of advanced training that will count towards the requirements for ASCH membership and certification.

TARGET AUDIENCE
The workshop is for intermediate to advanced practitioners though even those with basic knowledge can benefit.

ATTENDANCE POLICY
To receive attendance credit, you must be present for the entire workshop and sign the attendance sheets for both the morning and afternoon segments. No credit will be given to participants who are more than 15 minutes late at the beginning of the workshop, or to those who leave before the workshop adjourns.

REFUND POLICY
Refunds are available minus a $25 administrative fee if the cancellation is requested by November 13, 2009. Refunds are not available after that date.

REGISTRATION FEE
CTSCH Members................. $80
Non-members.................... $95
At-the-door.....................$110
Non-members may obtain a member fee by paying dues ($30) for 2010.

When possible, please pre-register for this event by using the form on page 4. We will accept registrations at the door, but early registration makes it easier for us to estimate the correct amount of food and other supplies. For questions about the program, contact George Glaser, LCSW, CTSCH Secretary at 512-371-9418, or by email at george@georgeglaser.com.

THE PRESENTER
Dr. Ewin is Clinical Professor of Surgery and Psychiatry at Tulane Medical School, and Clinical Professor of Psychiatry at Louisiana State University Medical School. He is Past President of both The American Society of Clinical Hypnosis (ASCH) and the American Board of Medical Hypnosis, and a Fellow of the Society for Clinical and Experimental Hypnosis (SCEH). He has received the Milton Erickson award of ASCH, the Roy Dorcas Award of SCEH, and the Pierre Janet Award of ISH. He has an active private practice treating psychosomatic disorders through hypnoanalysis.

He is a board certified surgeon and Occupational Medical specialist. Early in his career he was plant physician for the Kaiser Aluminum plant in New Orleans, and started using hypnosis for some badly burned patients. He became interested in psychosomatic medicine, developed a private hypnosis practice, and began teaching hypnosis at Tulane University Medical School in 1970, and at Louisiana State University Medical School in 1980.

Dabney’s books include Ideomotor Signals for Rapid Hypnoanalysis: A How-to Manual (with B. N. Eimer; Charles C. Thomas Publisher) and 101 Things I Wish I’d Known When I Started Using Hypnosis (Crown House Publishing).
